Fall 2011

**A New Design Concept proving:
"One size can fit all"** (or at least most)

In this issue we present the "Friends & Family Cabin". What's makes this the "Best Log Home Package"? Want to do it yourself? It's easy to build.

Almost all material in the package is "pre-cut" - not only our Solid Cedar Timber Logs, but most of the other building materials as well. 10" Cedar Logs for both the exterior walls and the interior center walls, and more. As always, the Plans, Blueprints, ButyLog™ Seal, Assy™ Fasteners, Window & Door Bucks, Energy Efficient double-pane Windows, and exterior Doors are included. And other options are available.

This is an "above foundation" package with so much versatility that we only offer it in one size: 36' x36'. You won't believe the floor plan possibilities! Two bedroom, three bedroom, one bath, two bath, no basement, full basement, duplex, and even a two-story. The material packages start at \$74,700, plus 4% delivery.

For the first time, we're offering on-site crews for above foundation construction. All you need to do is pull your permit, get your excavation and foundation done, then have an experienced construction crew do the rest. You can have all this and more, with above foundation construction starting at under \$100,000 (for the B2).

"Friends & Family Cabin"

Suppose you could "have your cake and eat it too"? Or that "non-fat" really was? Or there really was a Tooth Fairy? Or an Easter Bunny? Or Santa Claus? What would you wish for if a genie gave you three wishes? And don't give me that "world peace" answer! Maybe something you really, really want at a really good price?

Well, Santa wants you to have this great log home

package at an incredibly price. A 'build it yourself' log home package for a 1296 square foot Cedar Log Home. Cedar LogSystems has been granting log home wishes for 21 years and we've outdone ourselves.

We've never offered so many additional building materials before: Floor Trusses; Roof Trusses; Doug Fir 2"x6" Tongue & Groove Flooring; Cedar Window & Door trim; 1"x6" Tongue & Groove ceilings; Roof Sheathing; even the Metal Roof - all pre-cut. Two days of on-site assistance (per package - if you, your friends and your family each buy one and build at the same, we may never leave).

Why do we call it "Friends & Family"? If you have friends (or family) and you buy and build at the same time, guess what? The more log home packages, the lower the price. Too good to be true? Wait 'til you see the details and the plan options! B2 starting at under \$75,000 (trade possible?). *Now do you believe in Santa?*

The “Friends & Family Retreat”
 Precut Cedar Logs for exterior and interior
 Precut floor trusses and 2x6 flooring
 Roof trusses with precut roof sheathing

Food for Thought!

After many, many months of planning, this issue contains something new, something we have never offered before - actually several things we've never done before.

A cabin, a new log system, on-site construction services, in one "do everything" package.

As Bob Dillon once said, "the times they are a changin'". So "gather 'round people, wherever you roam..." ...want to live and enjoy the benefits of self-build. Or, if you prefer, have a contractor do most of the work for you!

These designs make the perfect cabin to "get away from it all" or start your own remote community, complete with solar, wind, pond, and garden, friends and family. Let's talk!

Trades possible?: 719.235.8242
